DEVELOPMENT OF THE TEACHING & RESEARCH CAPACITY OF
YOUNG ACADEMIC STAFF AT WROCŁAW UNIVERSITY OF TECHNOLOGY

The project provides the invitation of eight eminent professors per year. The stay of Visiting Professor is provided for a period of 6 days, during which Visiting Professor is required to carry out a series of 15 hours of lectures (usually 3 hours a day for 5 days, but other variants are also acceptable), and organize individual scientific meetings. These lectures are primarily intended for Wroclaw University of Technology PhD students, although students and employees (including non-WUT) are also welcome.

The main criteria for the competition include: the number of PhD students declaring their participation in the course, interdisciplinary themes supported by different research teams, faculty reputation, the possibilities of development of further cooperation in scientific fields (internships for young scientists, joint publications, co-author of PhD dissertation).

As a part of the project the scholarship (in the amount 1500 PLN gross per day) is paid, also the actual costs of the travel (up to 3200 PLN) are coved and the cost of accommodation for 6 days (up to 400 PLN per hotel night) is paid. In order to submit an application for inviting the professor a description of lectures in electronic form and list of potential course participants should be provided. Additionally, an application should be filled, which can be found at:
http://doktoranci.pwr.wroc.pl/pliki/pokl/zgloszenie_prof_wiz_2011.rtf
The application must include a Curriculum Vitae of a candidate for Visiting Professor.

Head of Doctoral Studies of the faculty that is inviting a Visiting Professor should designate a person that can help to prepare the application form and arrange other organizational issues. We propose that this person should be chosen form PhD students or young doctors.
